1.1 Important Safeguards

Please read all of these instructions carefully before you use the device. Save this manual for future reference.

What the warranty does not cover

- Any product, on which the serial number has been defaced, modified or removed.
- Damage, deterioration or malfunction resulting from:
  - Accident, misuse, neglect, fire, water, lightning, or other acts of nature, unauthorized product modification, or failure to follow instructions supplied with the product.
  - Repair or attempted repair by anyone not authorized by us.
  - Any damage of the product due to shipment.
  - Removal or installation of the product.
  - Causes external to the product, such as electric power fluctuation or failure.
  - Use of supplies or parts not meeting our specifications.
  - Normal wear and tear.
  - Any other causes which does not relate to a product defect.
- Removal, installation, and set-up service charges.
1.2 Regulatory Notice

Legal Information

First English printing, October 2002.

Information in this document has been carefully checked for accuracy; however, no guarantee is given to the correctness of the contents. The information in this document is subject to change without notice. We are not liable for any injury or loss that results from the use of this equipment.

Safety Instructions

- Unplug equipment before cleaning. Don’t use liquid or spray detergent; use a moist cloth.
- Keep equipment away from excessive humidity and heat. Preferably, keep it in an air-conditioned environment with temperatures not exceeding 40º Celsius (104º Fahrenheit).
- When installing, place the equipment on a sturdy, level surface to prevent it from accidentally falling and causing damage to other equipment or injury to persons nearby.
- When the drawer is in an open position, do not cover, block or in any way obstruct the gap between it and the power supply. Proper air convection is necessary to keep it from overheating.
- Arrange the equipment's power cord in such a way that others won’t trip or fall over it.
- If you are using a power cord that didn't ship with the equipment, ensure that it is rated for the voltage and current labeled on the equipment’s electrical ratings label. The voltage rating on the cord should be higher than the one listed on the equipment’s ratings label.
- Observe all precautions and warnings attached to the equipment.
- If you don’t intend on using the equipment for a long time, disconnect it from the power outlet to prevent being damaged by transient over-voltage.
- Keep all liquids away from the equipment to minimize the risk of accidental spillage. Liquid spilled on to the power supply or on other hardware may cause damage, fire or electrical shock.
- Only qualified service personnel should open the chassis. Opening it yourself could damage the equipment and invalidate its warranty.
- If any part of the equipment becomes damaged or stops functioning, have it checked by qualified service personnel.

Regulatory Notices Federal Communications Commission (FCC)

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

Any changes or modifications made to this equipment may void the user’s authority to operate this equipment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Re-position or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
1.3 Package Contents

1. LCD keyboard drawer x 1 pc
2. **CB-6** USB 2-in-1 KVM cable x 1 pc (for DS series)  **or**  **CE-6** Combo 4-in-1 KVM cable x 1 pc (for D series)
3. Fasteners for rear L-bracket x 4 pcs
4. 330mm rear mounting L-bracket x 1 pair
5. User manual x 1 pc
6. Power cord x 1 pc
7. Auto switch power adapter x 1 pc
1.4 Before Installation

- It is very important to locate the LCD Keyboard Drawer in a suitable environment.
- The surface for placing and fixing the LCD Keyboard Drawer should be stable and level or mounted into a suitable cabinet.
- Make sure the place has good ventilation, is out of direct sunlight, away from sources of excessive dust, dirt, heat, water, moisture and vibration.
- Position LCD Keyboard Drawer with respect to related facilities.

1.5 Unpacking

The LCD keyboard drawer comes with the standard parts shown on the package contents. Check and make sure they are included and in good condition. If anything is missing, or damage, contact the supplier immediately.

1.6 Optional Accessories

1. Combo 4-in-1 KVM cable
   1.1 CE-6 6 feet
   1.2 CE-10 10 feet
   1.3 CE-15 15 feet

2. USB 2-in-1 KVM cable
   2.1 CB-6 6 feet
   2.2 CB-10 10 feet
   2.3 CB-15 15 feet

3. Power Cord
   3.1 IEC power cord
   3.2 NEMA 5-15 power cord (US)
   3.3 BS 1363 power cord (UK)
   3.4 CEE 7/4 power cord (German)
   3.5 AS 3112 power cord (Australia)

4. “One Man” installation slides
   4.1 NBK-01 Single or “One Man” installation slides
   * Please refer to P.10 - 11 for Installation guidelines

Remarks:
- CB-6 is for DS series only.

### 1.8 Structure Diagram

1. Adjustable rear mounting L-bracket
2. LCD interchangeable module kit
3. LCD membrane
4. Membrane switch (KVM option)
5. Keyboard interchangeable module kit
6. Carry handle to release the 2-pt lock
7. Touchpad mouse module
8. 1U dual slide for LCD keyboard drawer
1.9 Installation

■ Install each rear L-bracket using two fasteners shown in Figure 1.
■ Leaving the fasteners slightly loose.

Figure 1. Installing the rear L-bracket to the LCD keyboard drawer.

■ Measure the front and rear mounting depth of the rack.
■ Align each rear L-bracket to a suitable length and tighten the fasteners shown in Figure 2.

Figure 2. Aligning the rear L-brackets to a suitable length for the rack.

■ Fixed the LCD keyboard drawer into the rack.

* Hardware (screws and cage nuts) for fixing the mounting bracket to the rack is not provided.

Figure 3. Fixing the LCD keyboard drawer into the rack.
1.10 How to Install "One Man" Installation Slides

Chapter 1

NBK-01 (Optional) Package Contents

1. Mounting bracket x 2 pcs
2. M6*15mm screw x 8 pcs
3. M6 cage nut x 6 pcs
4. Cup washer x 8 pcs

Install into rack

- Attach the left and right mounting bracket to rack 19" mounting rails.
- Adjust the rear mounting bracket to fit your rack.
- M6 screw and cup washer x 6 pcs included.

Caution: Leaving the screws slightly loose, until you complete the installation in step 4.
1.10 How to Install "One Man" Installation Slides

Chapter 1

- Pick up the LCD keyboard drawer.
- Insert the LCD keyboard drawer into the mounting bracket.
- Pull and hold the left & right black arrow buttons on the rails.
- Return the LCD keyboard drawer to park position.

- Attach front left and right mounting ears of the LCD keyboard drawer to vertical mounting rails.
- M6 screw and cup washer x 2 pcs included.

Complete the installation
- Tighten all 8 pcs of M6 screw to complete the installation.
1.11 How to Use The Slides

Chapter 1

- A white arrow release button is located on the outside of each slide (shown in Figure 4).

Figure 4. White arrow button.

- Push the white arrow button on either side of the upper LCD drawer to unlock (shown in Figure 5). Avoid pressing the red button located on either side.

Figure 5. Pushing the white arrow button.

- Hold down the white arrow button until the upper LCD drawer is located in the rack (shown in Figure 6).

Figure 6. Pushing the upper LCD drawer until it is located in the rack.

- Push the either side of the lower keyboard drawer until it is located in the rack (shown in Figure 7).

Figure 7. Pushing the lower keyboard drawer into the rack.
1.12 How to Use The Dual Slides

Chapter 1

- Gently pull the handle toward the front of the lower keyboard drawer (shown in Figure 8).

Figure 8. Pulling the handle toward the front of keyboard drawer.

- Push the handle toward the front of the upper LCD drawer (shown in Figure 9).

Figure 9. Pulling the handle toward the front of LCD drawer.

- Flip up the LCD to a suitable angle shown in Figure 10.

Figure 10. Flipping up the LCD to a suitable angle.

- Operate the LCD keyboard drawer shown in Figure 11.

Figure 11. Operating the LCD keyboard drawer.
1.13 Locking Bracket

- Release the locking bracket in Figure 12.

- The locking bracket will spring open in Figure 13.

- Flip up the LCD panel.
**Remarks:**

- The above connection is only for the LCD keyboard without KVM switch built-in.
- For the LCD keyboard drawer with KVM switch built-in, please refer to attached KVM switch user manual.

---

**Caution:** The LCD keyboard drawer is hot-pluggable, but components of connected devices, such as the servers and KVM switch, may not be hot-pluggable. Plugging and unplugging cables while servers and KVM are powered on may cause irreversible damage to the servers, KVM and LCD keyboard drawer. Before attempting to connect anything to the LCD keyboard drawer, we suggest turning off the power to all devices before connecting them. Apply power to connected devices again only after the LCD keyboard is receiving power. The company is not responsible for damage caused in this way.
Remarks:
- The above connection is only for the LCD keyboard without KVM switch built-in.
- For the LCD keyboard drawer with KVM switch built-in, please refer to attached KVM switch user manual.

**Caution:** The LCD keyboard drawer is hot-pluggable, but components of connected devices, such as the servers and KVM switch, may not be hot-pluggable. Plugging and unplugging cables while servers and KVM are powered on may cause irreversible damage to the servers, KVM and LCD keyboard drawer. Before attempting to connect anything to the LCD keyboard drawer, we suggest turning off the power to all devices before connecting them. Apply power to connected devices again only after the LCD keyboard is receiving power. The company is not responsible for damage caused in this way.

**Chapter 3**
3.2 Keyboard & Mouse

For D series

N keyboard integrated with touchpad

Supporting layouts

[Icons for various languages]
3.2 Keyboard & Mouse

For DS series

NS keyboard integrated with touchpad

- Incorporates SUN keys, including Stop, Cut, Paste, Compose, Copy and Help
- 104 key notepad keyboard with full numerical pad and SUN function
- USB interface
3.3 How to Use "NS" keyboard

- NS SUN-compatible keyboard incorporates SUN short-cut keys.

- Press the Fn/Num button to switch the color the Num LED.

Num LED in Off mode
Key pad behaves as a SUN Solaris system administration command mode

Num LED in Green color
Key pad behaves as a normal key pad mode

Three Audio / Display keys are located in the upper-right corner of the NS keyboard:
- Audio : Mute, decrease in volume and increase in volume.
- Display : Degauss, decrease contrast and increase contrast.
- Please ask your supplier for full details

P.20
4.1 KVM Options

Our KVM is designed to seamlessly integrate into the rear of our full range of LCD drawer solutions:

- For KVM operation, please refer to KVM user manual
- Option with Multiple consoles Matrix KVM
- Option with high density & cost efficient Combo KVM integration with either 8 / 16 / 32 ports
- Option with low cost PS/2 KVM
- Please ask your supplier for full KVM details

Remarks
- DS series is for Matrix & Combo KVM only.

4.2 DVI-D Option

Remarks
- Package includes 1 x 6ft DVI-D cable and 1 x 6ft 2-in-1 keyboard & mouse cable
- In DVD-D option, no VGA signal input is included

4.3 BNC + S-Video Option

Remarks:
- Package includes 1 x 6ft S-Video cable
4.4 Audio Option

Remarks

- Audio input is 35mm audio plug
- The speaker is sharing the same power with LCD.

Remarks:
- Package does not include power cord and AC power adapter
5.1 Troubleshooting

1. Is interference signal appeared on LCD normal when shutting down the computer?
In rare cases, interference may appear on the monitor. This may be caused by signal rate of VGA card and is considered normal. The image quality can be improved by adjusting the phase or pixel rate automatically or manually.

2. The membrane power light is not ON
Press the power On / Off on LCD membrane to check if the monitor is in the ON mode.
Check the power cord is properly connected to the LCD keyboard drawer and power outlet.

3. Screen image is not centered or sized properly
Press the button for two seconds to automatically adjust the image.
Adjust the H-position and V-position settings via On-screen menu.

4. Is the LCD keyboard drawer hot-pluggable?
The LCD keyboard drawer is hot-pluggable, but components of connected devices, such as the servers and KVMs, may not be hot-pluggable. We suggest turning off the power to all devices before connecting them. Apply power to connected devices again only after the LCD keyboard receives power.

For D series

1. How do I adjust the resolution?
To change monitor resolution, click Start -> Control Panel -> Display. Select Setting tab to adjust the monitor resolution in Desktop Area. The available resolutions, "640 x 480", "800 x 600", "1024 x 768", "1152 x 864", "1280 x 1024", are determined by the display card in your computer.

For DS series

1. How can I adjust the monitor resolution to 1152 x 900 for SUN Micro system?
The DS solution LCD keyboard drawer will automatically detect the 1152 x 900 resolution, so no user configuration should be necessary.

2. How do I adjust the resolution in MS Windows operation system?
To change monitor resolution, click Start -> Control Panel -> Display. Select Setting tab to adjust the monitor resolution in Desktop Area. The available resolutions, "640 x 480", "800 x 600", "1024 x 768", "1152 x 864", "1280 x 1024", are determined by the display card in your computer.

3. The Stop-A hot key is not work in Trusted Solaris
The keyboard combination Stop-A (L1-A) is not available in Trusted Solaris by default. The security administrator can change this.

4. Is interference signal appeared on LCD normal when shutting down the computer?
In rare cases, interference may appear on the monitor. This may be caused by signal rate of VGA card and is considered normal. The image quality can be improved by adjusting the phase or pixel rate automatically or manually.
